

YEUDIS HAROLD VÁSQUEZ

Boston, Massachusetts - Website: <https://yeudisvasquez.github.io/>

OVERVIEW:

Bilingual Systems and Computer Engineer specialized in **Data Engineering**, SQL/PostgreSQL, automation, and Azure cloud data pipelines. Experienced in automating database migrations, ingesting data into Azure Data Lake, and delivering version-controlled solutions using **Git/GitHub**.

EDUCATION:

B.S. Computer Science and Systems Engineering
Universidad Dominicana O&M

Grad Date: Dec. 2024

PROJECTS:

Database Migration Excel to PostgreSQL [LINK](#)

- Developed a Bash-based ETL automation script to load CSV datasets into PostgreSQL using psql.
- Implemented automated schema validation and repeatable data ingestion workflows.
- Reduced manual data loading effort by enabling one-command execution for database migrations.
- Applied best practices in scripting, SQL, and version control with Git/GitHub.

Data Ingestion from .csv file using Bash script into PostgreSQL Database [LINK](#)

- Designed and implemented a data ingestion workflow to load two CSV datasets into a PostgreSQL database using Bash, SQL and psql.
- Created database schema and relational structure to ensure data consistency and integrity.
- Executed batch inserts using bash and verified successful data loads through SQL queries.
- Practiced database normalization, primary keys, and structured data modeling.
- Version-controlled project using Git & GitHub.

Automated Data Ingestion from Public APIs to Azure Data Lake (Python) [LINK](#)

- Extracted procurement metadata and document URLs from a public REST API "https://datosabiertos.dgcp.gob.do/api-dgcp/v1/procesos".
- Programmatically downloaded PDF files using Python and organized them by process ID.
- Uploaded structured data and documents to Azure Data Lake using AzCopy.
- Implemented folder partitioning and post-upload cleanup automation.
- Version-controlled pipeline using Git and GitHub.

EXPERIENCE

Santander US Bank – Relationship Banker

Current

Responsible for delivering personalized **financial solutions** to individuals, students, and small business clients. Skilled in **account acquisition, needs-based selling, and relationship management** while maintaining strict compliance with banking regulations. Bilingual professional (**English & Spanish**) with a strong focus on **customer experience, financial education, and cross-selling bank products**.

TransPerfect - Bilingual Operations Supervisor

March 2024 – Jan 2026

Responsible for delivering English–Spanish interpretation across Healthcare, Finance, Mortgage, and Insurance sectors while ensuring HIPAA compliance and confidentiality. Supervised a team of 18 interpreters, managing performance, scheduling, and operational compliance. Analyzed QA, productivity, attendance, and conformance metrics to support data-driven reporting and decision-making. Led onboarding, coaching, and PIP initiatives in collaboration with Training and Management. Conducted client issue investigations, implemented corrective actions, and maintained compliance documentation. Developed SOPs and automated transportation workflows using Power Automate, improving efficiency and data accuracy.

Software Development, Systems & Data Engineering

Sept 2019 – Dec 2024

Responsible for developing **C# object-oriented applications (Windows Forms, console, Xamarin)** using **Visual Studio**, integrating **XAML** for **UI design** and **SQL/Firebase** for data storage and management. **Migrated on-premises SQL Server databases to Microsoft Azure**, implementing secure, scalable cloud solutions with **Entra ID (Azure AD)** for identity, authentication, and access control. Designed and optimized SQL databases using **T-SQL**, stored procedures, and functions with strong focus on data integrity, performance, and error handling. Built data pipelines, analytical datasets, and Power BI dashboards to support **KPI reporting**, trend analysis, and business intelligence **for data-driven decision-making**.

COURSES AND CERTIFICATIONS:

- **Relational Databases/ Bash Scripting/ PostgreSQL**– FreeCodeCamp, 2026
- **Data Sciences Applied to Big Data** – APEC, Dec 2025
- **SQL Programming** – ITLA, Dec 2025
- **Microsoft Azure Data Fundamentals** – ITLA, 2025
- **SQL and Relational Databases 101** – IBM, 2025
- **Data Analytics Essentials** – Cisco Networking Academy, 2024
- **Introduction to Data Science** – Cisco Networking Academy, 2024
- **Excel Skills: Data Analysis & PivotTables** – TransPerfect, 2024
- **SQL Server Administration** – Universidad Dominicana O&M, 2024
- **Windows Systems Administration** – Universidad Dominicana O&M, 2023
- **C# Object-Oriented Programming** – Politécnico Ntra. Sra. Del Carmen, 2015

LANGUAGES:

Spanish (Native writing and speaking)

English (Professional Advanced writing and speaking)
